Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This is the first office action for serial number 10/777,669. This application contains claims numbered 1-15. Claims 16-20 have been canceled.

1. Applicant's election without traverse of Group I, the species of Figs. 46-47, claims 1-15 in the reply filed on 10/15/04 is acknowledged.

Currently claims 1-15 are readable on the elected species. An examination as follows:

2. Applicants have canceled claims 16-20 by a preliminary amendment filed 2/12/04. Thus no claims are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.
3. Amendment to specification filed on 2/12/04 has also been entered.
4. IDSs submitted on 2/12/04 and 10/15/04 have been reviewed and considered.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 0075550 to Holloway.

Holloway discloses a member connector (Figs. 6-12) comprising a body (2) including a bottom wall and two side walls defining a trough, the body having a body terminal end defining an overlap region (12, 12a, 12b, 11); a locking element including a spring (21) (Fig. 7) and a spring release mechanism (1, generally) (see Figs. 10-12), the spring including first and second spring arms (22, 23, 27) (Fig. 7) extending substantially generally in opposition to one another in a plane generally parallel to the longitudinal direction, where the spring release mechanism is forced by the spring into the locked position; the locking element defining a hole (no numeral) which is capable of receiving a fastener where the fastener can be a screw.

Allowable Subject Matter

6. Claims 4-7 and 9 are objected to, but would be allowable if rewritten to include all of the limitations of the base claim and any intervening claims.

Claims 10-15 are allowed.

7. The following is a statement of reasons for the indication of allowable subject matter: Claims 10-15 are allowed because of the following reasons:

None of the prior art of record discloses or suggest the locking element including a main body with a railway on which a spring release mechanism slides, the locking element including an unlocked position, in which the spring release mechanism is held by the locking element in engagement with the spring, and a locked position, in which the spring release slides along the railway in the longitudinal direction to release the spring as recited in claim 10.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
